Dear

Thank you for your referral for this patient.

Chromosome analysis by chromosomal microarray is indicated in this case. This is now available to all paediatricians for investigation of children with developmental delay, congenital abnormalities or dysmorphism. As per the attached guidelines, I would therefore be grateful if you could arrange chromosome microarray analysis for your patient and then re-refer with the results. These guidelines have been introduced with the aim of reducing the number of genetics clinic visits required and to speed up the diagnostic process.

Many thanks for your help.

Yours sincerely,

A handwritten signature in black ink, appearing to be 'ML', written over a light blue circular stamp.
