Dear Dr Frog

Following the referral for you/your child to the clinical genetics dept and we wrote to you with information on how to book an appointment. Unfortunately we have not heard from you and therefore have not arranged an appointment for you at this time.

Did you know you can refer yourself or your child to our service? If you still wish to be seen, or change your mind in the future, you can contact us using the details at the top of this letter. If we have previously sent you a family history form you can complete this and return it to us and we will treat either of these as a self-referral. If it has been some time since your initial referral please discuss with your GP or specialist whether a referral to Clinical Genetics would still be relevant to you/your child.

If you have any difficulties accessing our service we will be happy to try and assist.

Yours sincerely,

Isaiah Olatunbosun
